市政文旅项目 实景案例展示

梁启超先生曾提到的“少年强则国强”。儿童是祖国的未来民族希望。随着时代快速前进，城市乡村的文化复兴发展日益迫切，关于儿童思想与创新的启蒙也要与之融合，培养独立生活的意识，逐步适应社会，与城市文化结合。对此儿童游乐渗入市政文旅项目逐渐展开并发展。

儿童有享受游戏和娱乐充分机会的权利，各种游戏娱乐必须与教育保持同一目的，社会和主管机关必须为促进儿童对这种权利的享有而努力。

Mr. Liang Qichao once mentioned that 'If the young are strong, the country will be strong.' Children are the future and hope of the nation. With the rapid advancement of the times, the cultural revival and development of both cities and rural areas are becoming increasingly urgent. Enlightenment regarding children's thinking and creativity must also integrate with this, cultivating awareness of independent living, gradually adapting to society, and combining with urban culture. In this regard, children's play is gradually being incorporated into municipal cultural and tourism projects and developing.

Children have the right to fully enjoy play and entertainment, and all forms of games and entertainment must align with educational objectives. Society and the relevant authorities must strive to ensure that children can enjoy this right.

In the family-focused area of Suzhou Xinglanhui Commercial Plaza, we broke away from the traditional forms of play facilities and created a large, non-standard children's play space themed around an 'immersive forest.' At the center stands a lifelike artificial sculpted tree, surrounded by staggered and playful suspension bridges, allowing children to embark on a 'forest adventure' right inside the mall, while also providing families with a relaxed and enjoyable interactive environment.

项目介绍 / Project Introduction

城市绿洲之中，涌动着来自自然、艺术、人文、美学的无限灵犀，眼前的园区景观只是万中一隅。与城市绿洲同时亮相的，还有一座亚洲级独角兽奇幻乐园。戴着小墨镜的巨型独角兽将人们平凡的生活幻化成一次奇妙的旅程。

Amid the urban oasis flows an infinite connection to nature, art, culture, and aesthetics, with the park landscape before you being just a small part of it. Alongside the urban oasis, an Asia-level unicorn fantasy park also makes its debut. The giant unicorn, wearing little sunglasses, transforms people's ordinary lives into a magical journey.

The Water Amusement Series is a comprehensive product line integrating interaction, water play, and recreational fun. It systematically combines water-spray combination slides with various interactive water features, designed specifically for water-friendly environments including aquatic parks, outdoor pools, water parks, and resort destinations. Centered on “water interaction” and “safe play”, the series is dedicated to transforming static water bodies into vibrant, dynamic entertainment spaces that are both engaging and experiential. In terms of scenario adaptability, the series offers high modularity and configurability. Water-spray slides can be assembled into diverse configurations—such as straight, spiral, or enclosed types—to suit different site constraints. The water features cover multiple modes including ground fountains, interactive water guns, and timed showers, which can be deployed either independently or in coordinated arrangement. These elements can integrate into natural lake shores to create family-friendly splash zones or serve as the primary attraction in commercial water parks, effectively catering to the diverse needs ranging from shallow-water play for children to deep-water challenges for teenagers.
